Summary

Creative Technologist and Passionate Programmer with over 5+ years of expertise in designing and building scalable, high-performance web applications. Skilled in leveraging **Spring Boot**, **Spring Cloud**, and **microservice architecture** to deliver robust back-end solutions. Proficient in modern front-end frameworks such as **Angular**, **React**, and **Vue.js**, as well as **AWS cloud technologies** for seamless deployment and scalability. Passionate about creating innovative, user-focused applications while driving development efficiency and excellence.

Education

Mawlana Bhashani Science and Technology University, BSc Engineering in ICT Feb 2015 – Dec 2020

- GPA: 3.37/4.0 ([mark-sheet](#))
- **Coursework:** Algorithm design and analysis, Database management system, Advance java and mobile application, Data structure, Electronic Device and circuit, Artificial intelligent, Computer Programming

Experience

Senior Software Engineer, Liberty General Insurance – Pavilion Damansara, Malaysia July 2024 – Present

Payroll: Reliable Business Technologies SDN BHD

- Implemented LHDN eInvoice functionality for Liberty clients, driving operational efficiency and regulatory compliance
- Modernized a legacy codebase by adopting microservices architecture and integrating CI/CD pipelines using Jenkins, enabling seamless automated deployments
- Led cross-functional teams overseeing both back-end and front-end development, ensuring the delivery of high-quality solutions aligned with business objectives
- Developed and launched the Liberty Portal for internal and external users, incorporating Microsoft Entra ID for secure authentication
- Designed and implemented a WhatsApp notifier for sending automated notifications directly to clients' WhatsApp numbers
- Built a dynamic invoice PDF generator to streamline invoicing processes and improve client interactions
- Technologies utilized: Java, Spring Boot, Microservice, Vue.js, MS SQL, GitHub, Microsoft Entra ID.

Back-end Engineer, TM Research and Development – Cyberjaya, Malaysia June 2023 – June 2024

Payroll: Reliable Business Technologies SDN BHD

- Enhanced application performance by optimizing SQL queries and database operations, resulting in improved system efficiency
- Delivered scalable solutions by leveraging Firebase Cloud Messaging and implementing robust design patterns to support growth and reliability
- Played a key role in API enhancements and promptly resolved production issues, ensuring seamless system functionality and user satisfaction
- Technologies utilized: Java, Dropwizard, Oracle SQL, GitLab

Software Engineer, Bitmascot (Pvt.) Ltd – Dhaka, Bangladesh Feb 2020 – May 2023

- Integrated multiple payment gateways to support diverse transaction methods and enhance user convenience
- Connected and streamlined Point of Sale (POS) applications with the billing system for seamless operation
- Migrated the legacy UI to a modern frontend framework, improving usability and aesthetics

- Developed a robust system to manage gift cards across various Point of Sale (POS) applications, offering flexibility to users
- Technologies utilized: Groovy-Grails, Java, MySQL, RabbitMQ, Payment Gateways, Websocket, React.js, Vue.js

Projects

Shipping Rate Comparison App

[github](#)

- Developed a middleware solution that compares shipping rates between City Link Express and JT Express. Users can submit shipment details, and the app returns rate comparisons from both providers for easy decision-making
- Tools Used: Java, Spring Boot, Swagger, MySql, Salenium

Real Time Chat App

[github](#)

- Built a real-time chat app using WebSocket and STOMP, with features like user authentication, message delivery tracking, unread message count, and persistence of the database for chat history.
- Tools used: Java, Spring boot, Vue.js, Bootstrap 5

E-Commerce Platform

[github](#)

- Developed a user-friendly platform for online shopping and selling, enabling customers to browse and purchase products across multiple categories and vendors
- Tools Used: Python, Django, Bootstrap, JavaScript, jQuery, MySQL

Spring Boot Auth App

[github](#)

- Developed a secure user authentication and authorization system, enabling user registration, login, and profile management. Features include email verification, password reset, and role-based access control for enhanced security
- Tools Used: Java, Spring Boot, Spring Security, JWT, MySQL

Push Notification App

[github](#)

- Developed a push messaging system for seamless communication across multiple devices. The app is divided into backend (Spring Boot) and frontend (Angular) components, enabling centralized management of push notifications
- Tools Used: Java, Spring Boot, Angular, Firebase Cloud Messaging

Technologies

Languages: Java, JavaScript, Python, Groovy, C, C++, SQL

Back-End Technologies: Spring Boot, Dropwizard, Grails, Node.js, Django

Front-End Technologies: Vue.js, Angular, React.js, JQuery, Html, Css, Bottstrap

Database: MySQL, PostgreSQL, MsSQL, SQLite

Operating System: Linux, Windows

Other Tools: Git, Github, CI/CD, Docker, Aws(EC2), Swagger, RabbitMQ, RestFull Api, Soap, Maven

Certificates

Basic Java Programming Certification

Dec 2022

Issued by: Hacker Rank
